I. INTRODUCTION

A. Background

1. North Eastern Region Capital Cities Development Investment Program (NERCCDIP) is being undertaken for improvement of existing infrastructure, environmental quality and access to basic urban services of Kohima Municipal Council area. The NERCCDIP’s objective is to improve the urban environment and promote reforms for sustainable, efficient, and responsive urban service delivery. The Program components are Water supply and Solid Waste Management infrastructure.

2. With an overall objective of sustainable urban development, the NERCCDIP is being implemented in the five capital cities - Gangtok, Aizawl, Kohima, Gangtok and Shillong. NERCCDIP will be implemented over a six year period beginning in 2009, and is funded by a loan via the Multitranche Financing Facility (MFF) of the Asian Development Bank (ADB).

3. In Kohima, capital city of Nagaland, the Executing Agency (EA) for the program is the Urban Development Department (UDD) of the Government of Nagaland (GoN); and the Implementing Agency (IA) is the State-level Investment Program Management and Implementation Unit (SIPMIU), created within the UDD, specifically for the Investment Program implementation. At central level, Investment Program Coordination Cell (IPCC) is established in MOUD. IPCC is responsible for overall management of the Investment Program and is supported by Program Management & Monitoring Consultants (PMMC).

4. The water supply and solid waste management sub projects of Kohima under Tranche-1 (Loan No. 2528 IND) have been classified as Category B as per the ADB Environmental Policy, and accordingly IEE report was prepared during PPTA/BTA and was approved by the ADB.

5. Changes in location of some water tanks have been proposed in the water supply sub project being implemented and IEE and Environmental Monitoring Plan are being updated to address the changes in the location of tanks. Solid waste management sub project is being implemented as a design, build, operate and transfer project. Therefore, IEE and EMP will be updated during additional works. The sub projects are being screened using ADB checklist for any change in scope. If re-categorisation is required due to design changes, SIPMIU will submit the checklist to ADB for review and approval.

6. Environmental Monitoring Plan. An Environmental Monitoring Plan which addresses the potential impacts and risks identified by the environmental assessment has been included in the IEE reports. The level of complexity of the EMP and the priority of the identified measures and actions commensurate with the Project’s impact and risks. The EMP is part of bidding and contract documents.

B. Project Profile

7. At present, Subprojects under Tranche-1 (Loan No. 2528 IND) are under implementation in Kohima and focus on water supply improvements and solid waste disposal facilities. The water supply subproject (package no. KHM-WA 1) covers construction of 18 ground level RCC tanks (service reservoirs) and refurbishment of an existing water treatment plant.

8. The solid waste management subproject (package no. KHM-SWM 1) covers design, build, operation and transfer of a sanitary land fill, compost plant and internal access roads.
9. Details of the project activities under Tranche-1 (Loan No. 2528 IND) as of June 2013 are presented in the following Table.

Table 1. Sub Project Details under Tranche-1 (Loan No. 2528 IND)

<table>
<thead>

<td>Spread over Kohima Municipal Council</td>
<td>construction of 18 ground level RCC tanks (service reservoirs) and rehabilitation of the Water Treatment Plant</td>
<td>Locations of 8 ground level service reservoirs were changed and hence the IEE report is being updated.</td>
</tr>
<tr>
<td>2</td>
<td>Civil works and procurement of equipment for development of sanitary land fill, compost plant and internal access (KHM-SWM 1)</td>
<td>At Landfill site, Lerie</td>
<td>Design, build, operate and transfer of sanitary landfill, compost plant, leachate treatment plant and associated infrastructure</td>
<td>No changes during January – June 2013</td>
</tr>
</tbody>
</table>

10. Civil works of water supply sub project under Tranche-1 commenced during December 2011 and the estimated duration of works is 18 months. Physical progress as of June 2013 is 49.47 %. Construction of three tanks has been completed. Rehabilitation of water treatment plant and construction of seven tanks are under progress. Locations of eight tanks have been changed due to various constraints for construction and new locations have been identified for them. Construction of these tanks is not yet started.

11. Civil works of the solid waste management sub project under Tranche-1 commenced during January 2012 and the estimated duration of works is 24 months. Physical progress as of June 2013 is 33.00 %. Construction of landfill site and compost plant is under progress.

12. The Semi Annual Environmental Monitoring Report presents the status of sub project implementation, details of compliance with environmental regulations of the Government and policies of ADB, details of compliance with environmental loan covenants, details of complaints received and their redressal and the status of compliance with various aspects of EMP as stated in the IEE reports.

13. Monitoring of compliance with EMP is a continuous activity carried out by the DSMC and SIPMIU. Guidelines on general construction EHS measures to be followed / implemented have been issued to the Contractor. A reporting format to be filled up by the Contractor on a daily basis on compliance with EMP has been issued and they are being compiled on a monthly basis. This is the consolidated report on implementation of Environmental Management Plan (EMP) from January to June 2013, and is prepared in compliance with the ADB Policies.

II. ENVIRONMENTAL ASSESSMENT AND REVIEW PROCEDURE

A. Environmental Legal Requirements

14. The following Regulations are currently in force in India that deals with environmental issues that could apply to infrastructure development. Acts and Rules related to monuments and archeological sites are also listed herein.
(i) The Water (Prevention and Control of Pollution) Act, 1974, amended 1988
• The Water (Prevention and Control of Pollution) Rules, 1975

• The Air (Prevention and Control of Pollution) Rules, 1982

(iii) The Environment (Protection) Act, 1986, amended in 1991 and including the following Rules/Notification issued under this Act
• The Environment (Protection) Rules, 1986, including amendments
• The Municipal Solid Wastes (Management and Handling) Rules, 2000
• The Hazardous Wastes (Management and Handling) Rules, 1989
• The Bio-Medical Waste (Management and Handling) Rules, 1998
• Noise Pollution (Regulation and Control) Rules, 2000,
• Environmental Impact Assessment Notification, 2006
• Environmental Standards of Central Pollution Control Board (CPCB)

(iv) The Indian Wildlife (Protection) Act, 1972, amended 1993
• The Wildlife (Protection) Rules, 1995

(v) The Indian Forest Act, 1927

• Guidelines for Diversion of Forest Lands for Non-Forest Purpose under the Forest (Conservation) Act, 1980

(vii) Ancient Monuments and Archaeological Sites and Remains Act 1958
• Ancient Monuments and Archaeological Sites and Remains Rules 1959
• Government of India Notification of 1992 under the above-stated Rules

B. Compliance with Environmental Regulations

15. The GoI EIA Notification of 2006 sets out the requirement for Environmental Assessment in India. The Tranche-1 water supply improvement subproject does not fall under the ambit of the EIA Notification, and therefore does not require environmental clearances. However, the Tranche-1 water supply subproject requires consent to establish and operate under the Water Act and Air Act from the State Pollution Control Board.

16. The Tranche-1 Solid Waste Management subproject requires environmental clearance under the EIA Notification from Nagaland State EIA Authority. The Tranche-1 Solid Waste Management subproject further requires authorization under the Hazardous Wastes (Management and Handling) Rules, 1989 and Municipal Solid Waste (Management and Handling) Rules 2000 and consents to establish and operate under the Air and Water Acts from the State Pollution Control Board.

17. No other environmental or forest clearances are required for the subprojects in Kohima.

18. The following Table shows the regulatory requirements of subproject/components under Tranche-1 and the present status of compliance. Copy of Consent to Establish for water supply sub project is presented as Appendix 1. Copy of Environmental Clearance for Solid Waste Management subproject is presented as Appendix 2. Copy of Consent to Establish and Authorization for Solid Waste Management subproject is presented as Appendix 3.

C. Compliance of Environmental Loan Covenants

19. Table 3 shows the environmental safeguard related loan covenants and their compliance status in implementation. All the covenants are being complied in implementation.

20. Tranche-1 water supply and solid waste management subprojects have been classified as Category B as per the ADB Environmental Policy. Accordingly IEE reports were prepared during PPTA/BTA and were approved by the ADB. During the implementation stage, there was a change in the location of eight ground level service reservoirs. Hence, an updated IEE report is being prepared for these reservoirs.

</tbody>
</table>
S. No | Project Specific Covenants | Status / Issues
--- | --- | ---
1 | Implementation of sub-component facilities will be minimized by implementing the environmental mitigation and management measures, and other recommendations specified in environmental assessment reports (e.g., IEEs). The Government will ensure environmental requirements will be incorporated in bidding documents and civil works contracts. Issuance of bid documents will be made after review and clearance of IEE/EIA by ADB and SEIAA or MOEF. GOI will prepare and submit annually to ADB an environmental monitoring report that describes progress in implementation of the EMP and EAR projects and issues encountered and measures adopted; and compliance with the relevant assurances and loan covenants. | Obtained as per applicable regulations. Semi-annual environmental monitoring report is being submitted to ADB.

D. Environmental Organization and Management

21. The main agencies involved in managing and implementing the subproject are:

(i) **Ministry of Urban Development (MOUD)** - The national-level Executing Agency (NEA) for the Investment Program;

(ii) **Investment Program Coordination Cell (IPCC)** - It is established in MOUD. IPCC is responsible for overall management of the Investment Program in the 5 cities. It comprises of social/environmental safeguard specialists whose tasks include monitoring Program implementation and reviewing and screening the subprojects submitted by the States in accordance with subproject selection criteria, in accordance with the environmental provisions;

(iii) **State Investment Program Management and Implementation Unit (SIPMIU)** - It is established under the State Government and headed by a Program Director (PD). SIPMIU will oversee the implementation of the sub projects as per the Program's environment and resettlement planning. This includes the preparation of all documentation needed for decision-making, contracting, and supervision of work, providing progress-monitoring information as well as the compliance of all environmental safeguards.

The SIPMIU comprises of a Safeguards and Social Cell staffed with an Environmental Officer (EO). The EO is responsible for implementing the environmental safeguard provisions in the project including (i) ensuring environmental criteria for subproject selection in the EAR; (ii) ensuring mitigation requirements in the Bid documents; and (iii) liaising with various Central and State government agencies on compliance matters. The SIPMIU will appoint and manage Construction Contractors (CC) to build elements of the infrastructure who are required to submit Environmental Implementation Plans (EIPs) to SIPMIU approval.

(iv) **Design, Supervision and Management Consultant (DSMC)** - The SIPMIU is assisted by the DSMC, who is responsible for the design of the infrastructure, manage tendering of contracts, and supervise the construction process;

An Environmental Specialist (ES) in the DSMC is responsible for addressing the environmental issues in the project components during design and implementation. The ES will ensure that all mitigation requirements are in the bidding documents and EIPs, and will supervise the effective implementation of
environmental provisions during construction. In addition, the ES will assist the SIPMIU on the procurement needs and other project implementation aspects and shall play a central role in ensuring capacity building on environmental management of the SIPMIU, the Contractor and the Line Departments through capacity development support and training.

22. No grievances were received during the reporting period. A grievance redressal mechanism has been established. Grievances of affected persons will first be brought to the attention of the SIPMIU. Grievances not redressed by the SIPMIU will be brought to the Independent Grievance Redress Committee (IGRC) set up to monitor project implementation in Kohima. The GRC will determine the merit of each grievance, and resolve grievances within 10 days of receiving the complaint. Grievance not redressed by the IGRC will be referred to the appropriate courts of law. The DSMC will keep records of all grievances received including: contact details of complainant, date that the complaint was received, nature of grievance, agreed corrective actions and the date these were affected, and the final outcome. The IGRC was constituted vide SIPMIU notification dated 18.01.2013. Details of grievance redressal mechanism and the IGRC notification for the sub projects are presented as Appendix 4.

III. EMP COMPLIANCE STATUS

23. This section presents the compliance status of Environmental Management and Monitoring Plans of tranche-1 subproject under implementation.

24. Under this subproject, at present the Refurbishment of Kohima water supply scheme and the civil works and procurement of equipment for development of sanitary land fill, compost plant and internal access are in progress. The Contractors have not prepared any Environmental Implementation Plan. They are following the Environmental Monitoring Plan, which is part of the IEE and Contract document. In addition to that, guidelines on general construction EHS measures to be followed / implemented by the Contractors have been issued to them.

25. Water quality monitoring was conducted by the Solid Waste Management sub project Contractor during the reporting period. Water samples were collected from rivers near the landfill site and analyzed for various water quality parameters. The water quality test results show that there is no pollution of the river due to construction activities at the landfill site. Details of Water quality monitoring are presented as Appendix 5. Photographs of ongoing construction works and environmental management measures are presented as Appendix 6.

</table>
IV. OBSERVATIONS, RECOMMENDATIONS AND ACTIONS TAKEN

26. As presented in this report, tranche-1 of this Investment Program is being implemented in compliance with the loan covenants, subproject selection criteria and overall EARF. There are some non-compliant EMP activities noticed in the monitoring report regarding the solid waste management sub project. The Contractor has not planted trees around the landfill site. Instruction has been given to the Contractor to plant trees before the end of monsoon. The Contractor has not prepared a construction site management plan. To compensate this, guidelines on general EHS measures to be followed at construction sites have been issued to the Contractor. These include measures to exclude public from all construction sites. Compliance to these measures is being strictly monitored by the DSMC. The Contractor has not imparted health and safety training to all their personnel. Health and safety training was given to the Contractor’s Supervisors by the ES of DSMC. Instruction has been given to the Contractor to conduct training to all personnel. The Contractor is not maintaining an Accident Report Register. Instruction has been given to the Contractor to maintain Accident Report Register. Summary of accidents reported will be provided in the next semi-annual EMR. No ambient air quality monitoring was conducted by the Contractor during the reporting period. The Contractor has been instructed to do the same.

27. Necessary instructions have been given to the Contractor by DSMC/SIPMIU to specifically focus on safety aspects, and in general on EMP measures to improve the compliance.
APPENDICES
Appendix 1: Consent to Establish for Water Supply Sub Project

NAGALAND POLLUTION CONTROL BOARD
SIGNAL POINT: DIMAPUR: NAGALAND

Consent Order / Authorization

Consent No. 203

Consent to Establish under Section 25/26 of the Water (Prevention & Control of Pollution) Act, 1974, as amended and under Section 21 of the Air (Prevention & Control of Pollution) Act, 1981, as amended to be referred as Water Act and Air Act respectively.

Consent is granted to State Investment Program Management and Implementation Unit, Asian Development Bank, (ADB) Assisted Project Kohima, Nagaland, located in the area declared under the provisions of the Water Act & Air Act and subject to the provisions of the Act and the Rules and the Orders that may be made further and subject to the following terms and conditions:-
